AGENDA ITEMS  
for  
1972 CINCPAC LOGISTICS AND INFILTRATION CONFERENCE  
18-22 SEPT 1972

- A. Review of Laos input/output methodology to include methodology for estimating input and output (throughput) when gaps in source material preclude comparative analysis. Note: It is believed that contingency plans for gapfilling logistic data can be among the most significant results of Conference. Methodologies coordinated beforehand will help to assure more realistic assessments of enemy logistic capabilities.
- B. Methods for estimating supply flow from Laos into and through Cambodia.
- C. Use of Cambodia as a source of supply for Communist force in Laos/South Vietnam.
- D. Effect and significance of reorganization of GDRS structure in Laos Panhandle, particularly the establishment of new, intermediate control authorities.
- E. In-country logistics operations; i.e., what happens to materiel after GDRS elements relinquish control.
- F. Review overall infiltration gapfill methodology and the assignment of estimated strengths.
- G. Review infiltration group attrition and travel time for 1971-1972 dry season infiltration campaign.
- H. Series to include strength, destination, and a gapfill methodology and the outlook for the 1972-1973 dry season infiltration campaign.
- I. Effects of the NVA shifting infiltration routes from Laos to direct DMZ crossings.
- J. Significance of water routes and ocean lines for direct transportation of logistics and personnel to SVN.
- K. Possible use of maritime shipping and seaborne trawler infiltration to Cambodia as a source of supplies for VC/NVA forces in COSVN.
- L. Review of methodology for assessing enemy truck inventory.
- M. Organizational structure of Thai insurgency to include methods of logistics and personnel support.
- N. Future assets available to monitor GDRS system.
